

Wedding Art and Design by Julian Bourn

Unique, personalised
stationery and more!

Bring unique style to your wedding - from the invitation to the reception table decor. It's the elegant details that make the difference, so why not customise them? You may choose to have co-ordinating table name places for the guests or a personalised design on your order of service...

Create your special look from the designs shown over these pages. Many aspects, such as colour, can be manipulated, allowing you to complement your overall wedding scheme. Alternatively you may wish to have a photo or art of your own incorporated, or commission me to create a truly bespoke piece - perhaps to sketch a likeness of the bride & groom.

Other services include large scale printed artwork, such as photo montages of the happy couple for display at the reception. I can also have your design blown up to be used as a backdrop, or perhaps printed on canvas and made available as an addition to your gift list.

Great ideas start with great conversations, just give me a call and let's talk about yours.

Caricatures & other Artwork

For a truly unique touch you can commission me to create an original piece of artwork; from a snappy caricature to something specifically romantic to you as a couple.

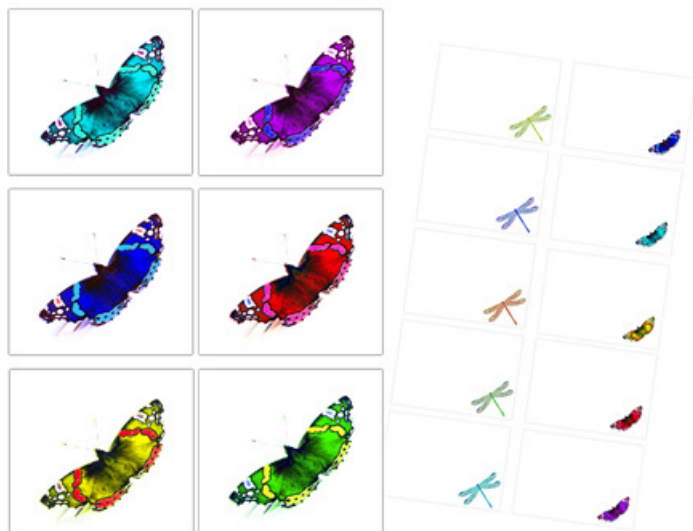

This artwork can then feature on any stationary, as well as being printed as a stand alone piece in its own right.

Taking this stylised lily image as an example, see above how a design may be tailored to your preference; from colour to layout to text font and the inscription you wish to have adorn the card. In this way you may have complementing invitation, order of service and thankyou cards... or you may choose to make each subtly different.

Shown below are table idents and place name tags. The designs follow a client's desire to have reception tables themed with different coloured butterflies and dragonflies.

Pictured right is a custom made oversized card which was created to work alongside the above designs. Guests could inscribe their best wishes for the bride and groom, the card could then be framed or simply kept as a record of affection to treasure.
